DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 9/8/2006 have been fully considered but they are not persuasive.

Applicant has argued that the ODV produced in Jerussi is different from the claimed compound because the pH used in the recovery process is not above 9.5. This argument is not convincing because Jerussi clearly made ODV in a very pure form. Furthermore, Jerussi clearly distinguished when salts were made in the examples. Therefore, it is reasonable to assume that the ODV made in example 2 is the free base and thus meets the claimed invention. The difference in the NMR is also not sufficient to shift the burden back to examiner because there are many variables that can cause a shift in NMR data. For example solvent effects can cause a shift in NMR data.

Applicant has argued that the prior art of Jerussi and Husbands do not provide motivation to make the ODV base since the examples in the said references indicated that the HCl salts of venlafaxine derivatives were typically made. This is not found convincing because a person of ordinary skill in the art would not be limited to the disclosures of the Jerussi and Husband. Ordinary skilled artisans in the pharmaceutical art routinely administer known pharmaceutical compounds as the salt or the free base. Therefore, one skilled in the art would be motivated to make both the salts and free base of a pharmaceutical compound as pure are possible. This purity is required by the FDA in order to get pharmaceutical compounds on the market.

Claim Rejections - 35 USC § 102

Art Unit: 1621

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Jerussi et al (WO 00/59851).

See example 2 on pages 20-21. Also see previous office action and the examiner's response to applicant's arguments addressed herein.

5. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Husbands (US 4,535,186).

See previous office action and the examiner's response to applicant's arguments addressed herein.

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 1621

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
